

STREAMLINE YOUR BUSINESS WITH HALTIAN INVENTORY TRACKING SOLUTION, HITS

Know where your assets are in real-time and scale up to millions of assets with the Haltian Inventory Tracking Solution, HITS.

What are the challenges?

The current solutions for tracking assets do not work:

1. The manual tracking solutions are **resource consuming** and result in **delays, errors and inaccurate data**
2. Existing IoT based solutions require **high up-front investments** due to the **wiring costs and high-priced tags**.
3. Many solutions have **challenges with scalability and density**.

Tracking assets is easy with HITS

Haltian Inventory Tracking Solution provides detailed information of your assets and their exact locations in real-time.

- Scales up to **millions of assets** and handles **up to 10.000 assets in one pallet** (1m3).
- **The fastest ROI** in the market and **no heavy up-front investments**. The solution doesn't require costly alternations to existing buildings.
- **No vendor lock-in** as the solution can use any asset tag with Wirepas connectivity, and **can be integrated into any 3rd party application** via Haltian IoT API.
